# EWA JOANNA LIS

## ABOUT ME

I am currently working at Objectivity as Junior Software Developer, where I work with C#, SQL and React. I have completed my Bachelor's degree in Materials Science and Engineering and a JavaScript Developer bootcamp organized by an IT school - Coders Lab. I also speak English fluently. I have always been fascinated by programming and I finally started looking for development opportunities in this field and make my dreams coming true, because I enjoy taking risks.

## PORTFOLIO

**https://ewalis1.github.io**

- Project "Oddam w dobre ręce" - page created during the JavaScript Developer course. On this page you can give away unnecessary clothes and other stuff, using a simple form. It is written in React.js and Sass, but also uses React-router, React-scroll, Firebase, localStorage and Json server.
Link: https://github.com/ewalis1/portfoliolab
- Project "Bikeszkoła calendar"- page with calendar and simple form, which helps you to sign up for MTB training with a professional instructor. Page uses React.js and Moment.js library, Bootstrap framework, Json server and Sass language.
Link: https://github.com/ewalis1/calendar_course
- Project "Bestshop" - my first page, written in HTML and CSS
